Education

Bachelor of Science in Economics 03/2019 – 10/2024
School of Economic Sciences - University of Buenos Aires (FCE – UBA)
Thesis: *Borrowing, leveraging and pro-cyclicality: a sector-disaggregated analysis*
GPA: 8.45/10.-

Experience

Academic – research & data

- Research intern** 06/2023 - now
Interdisciplinary Institute of Political Economy (IIEP Baires – UBA – CONICET)
Currently assisting in projects leveraging unstructured text data and Large Language Models (LLMs) to extract inflation expectations through synthetic surveys.
Intense use of Python to fine-tune models and financial software to download earnings conference calls’ transcripts.
- Research assistant (RA)** 04/2022 - now
I assist Damián Pierri (Ph.D., University of San Andrés) in various working papers, mostly in data gathering, processing and analytics (empirical economics).
Papers I assisted with include:
 - [in process] - External borrowing and endogenous growth
 - 2023 - [An ergodic theory of sovereign default](#).
- Research assistant** 01/2022 – 02/2023
National University of La Matanza (UNLaM)
I developed and managed the entire data cycle, from extraction and processing to analysis and visualization, for a monthly publication of key indicators in energy economics.
More at [projects/energy](#).

Non-academic

- Data analyst** 2022, on demand
Freelance (online platforms)
I conducted small-and-medium sized data analysis projects for different clients, mainly using Excel and Python.

Teaching

- Teaching assistant**
School of Economic Sciences - University of Buenos Aires (FCE – UBA)
 - **Macroeconomics II** 03/2024 – now
 - **Mathematics for Economists** 12/2022 – 07/2024
 - **Macroeconomics I** 03/2021 – now

Software and programming

Python: advanced | **R:** intermediate | **STATA:** intermediate | **L^AT_EX:** advanced

Languages

Spanish: native | **English:** advanced (CEFR C2) | **French:** intermediate (CEFR B1) | **Latin:** basic

Side projects

Data analysis and visualization

Relevant projects:

- BCRA_bot**
I developed a Twitter bot ([@BCRA_bot](#)) in Python that tweets daily updates of Argentina’s monetary statistics.
More at [projects/BCRA_bot](#).
- Econ**
I transform complex economic data into engaging and interactive visualizations, turning raw information into clear, actionable insights that are easy to understand and impactful.
More at [projects/Econ](#).
