Education

Bachelor of Science in Economics 03/2019 – 10/2024
School of Economic Sciences - University of Buenos Aires (FCE – UBA)
Thesis: *Borrowing, leveraging and pro-cyclicality: a sector-disaggregated analysis*
GPA: 8.45/10.-

Experience

Academic – research & data

- Research intern** 06/2023 - now
Interdisciplinary Institute of Political Economy (IIEP Baires – UBA – CONICET)
I participate in research projects aimed at extracting inflation expectations from the market.
My tasks include building databases, developing and reviewing code, and participating in the fine-tuning process of the models.
Techniques used: synthetic surveys completed through Machine Learning, such as Large Language Models (LLMs).
Extensive programming in Python.
- Research Assistant (RA)** 04/2022 - now
I actively contribute to the collection, processing, and analysis of data for multiple academic articles.
Supervised by Damián Pierri (Ph.D., Universidad de San Andrés).
- Research & Data Visualization Assistant** 01/2022 – 02/2023
National University of La Matanza (UNLaM)
I developed and managed the entire data cycle, from extraction and processing to analysis and visualization, for a monthly publication of key indicators in energy economics.

Non-academic

- Data analyst** 2022, on demand
Freelance (online platforms)
I carried out data analysis and visualization projects for various clients (Chile, USA).
Used Excel, Python, and R.

Teaching

- Teaching assistant**
School of Economic Sciences - University of Buenos Aires (FCE – UBA)
 - **Macroeconomics II** 03/2024 – now
 - **Mathematics for Economists** 12/2022 – 07/2024
 - **Macroeconomics I** 03/2021 – now

Software and programming

Python: advanced | **R:** intermediate | **STATA:** intermediate | **SQL:** intermediate

Languages

Spanish: native | **English:** advanced (CEFR C2) | **French:** intermediate (CEFR B1) | **Latin:** basic

Side projects

Data analysis and visualization

Relevant projects:

- Econ**
I transform complex economic data into engaging and interactive visualizations, turning raw information into clear, actionable insights that are easy to understand and impactful.
More at [projects/Econ](#).
- Ma-py-tas** 2022 – act.
I developed geospatial maps on various topics, using formats such as GeoJSON and data extracted through coordinate scraping.
